Education and training

Google UX Design Professional Certificate   *18 Oct 24 - Present*

Coursera

The Google UX Design Professional Certificate is an immersive program that provided me with a comprehensive understanding of user experience design principles and practices. Through a combination of theoretical knowledge and practical application, I developed the skills necessary to create user-centered designs that enhance usability and improve user satisfaction. Throughout the program, I completed multiple hands-on projects, culminating in a comprehensive portfolio that showcases my ability to address real-world design challenges. This certification has not only enhanced my technical skills but also deepened my understanding of the importance of user experience in driving product success

Front-End Development Libraries Certification   *1 Sep 24 - 1 Nov 24*

FreeCodeCamp

The Front End Development Libraries Certification from FreeCodeCamp is a comprehensive program designed to equip learners with the essential skills and knowledge necessary for modern web development. Throughout this certification, I gained hands-on experience in utilizing popular JavaScript libraries and frameworks, including React, Redux, Bootstrap, and jQuery. This certification not only solidified my technical expertise but also enhanced my problem-solving abilities, allowing me to build robust, user-friendly web applications. Through project-based learning, I successfully completed several real-world projects, showcasing my capability to integrate various libraries and frameworks in building comprehensive front-end solutions

Certificate in Web Development   *1 Apr 24 - Present*

SheCodes Bootcamp

·Completed hands-on projects, including building responsive websites using HTML, CSS, and JavaScript.
·Gained exposure to hosting and deploying websites, as well as integrating third-party APIs.
·Learned version control best practices through Git and GitHub

Abilities

Proficient in front-end technologies such as HTML, CSS, and JavaScript

Experience with back-end technologies like Node.js and Express

Strong understanding of database management systems like MySQL and MongoDB

Ability to work collaboratively in an Agile environment

Excellent problem-solving skills

Strong attention to detail

Personal skills

Communication skills

- User-centered Communication
- User Research and Feedback Integration
- Collaborative Teamwork
- Written and Visual Communication

Job-related skills

• **Front-End Development**

• **UI/UX Design**

• **React and Redux**

• **API Integration**

Digital skills

- Adobe XD for prototyping, wireframing, and visual design; comfortable with Sketch and Canva for additional design tasks.
- Design Software: Proficient in Figma and Adobe XD for prototyping, wireframing, and visual design; comfortable with Sketch and Canva for additional design tasks.
- Web Development Tools: Experienced with Git and GitHub for version control, and VSCode for efficient coding workflows.
- Responsive Web Design: Strong understanding of responsive design principles, ensuring web applications are optimized across devices.
- Content Management and Hosting: Familiar with Netlify for hosting, deploying, and managing web projects; proficient in managing assets and updates on GitHub. and GitHub for version control, and VSCode for efficient coding workflows.
- Responsive Web Design: Strong understanding of responsive design principles, ensuring web applications are optimized across devices.

Other skills

• **Problem-Solving and Debugging: Skilled in identifying, analyzing, and resolving coding or design issues, ensuring smooth project progression.**

• **Adaptability and Continuous Learning: Demonstrated commitment to ongoing learning and improvement, staying updated with the latest UX/UI design trends and development libraries.**

• **Empathy-Driven Design Thinking: Proficient in applying design thinking principles to create solutions that prioritize user needs and create meaningful interactions**
